# The Future Is Here

**GRASSFITT COATING AGENT**  
is a state-of-the-art  
nanoparticle coating  
designed to protect synthetic  
turf and other play surfaces from  
mould, algae, and bacteria.

**GRASSFITT Leading Innovation.**

# About **The product**

Applying GRASSFITT Coating Agent, can maintain a surface that is free from bacteria, moss, mould, and algae, ensuring a safer environment for everyone. Utilizing advanced nanoparticle, this coating protects artificial turf in both the sports and landscape sectors, whether at the point of manufacture or after the grass is laid. It's safe for humans and animals, and provides players with the assurance that every possible measure has been taken to protect their well-being and secure their livelihoods. Ultimately, this benefits the entire community, including the long-term investment in the pitch condition and maintenance.

## Quick fire facts

- 1 L of concentrate covers 2000 m<sup>2</sup> of synthetic grass.
- Does not affect ball roll or ball bounce.
- Available in 1 L, 5 L, or 1000 L IBC.
- Fully lab tested and guaranteed to give results.
- Available as a concentrate or fully diluted.
- No specialist equipment required.
- Easy and fast application.
- Super fast drying times.
- Six months protection.

**Our goal** is to safeguard both the grass and the people who use it, particularly athletes and players, by protecting them from the various hazards that an artificial grass surface might present. Infections can be costly, not only to the players but also to the clubs and societies they represent.

### Drying time

The product is dry within 20 minutes and is the field is ready to be used

### Long-lasting

Super long-lasting with six months protection.

### The coating agent

1 L of concentrated covers 2000 m<sup>2</sup> of synthetic grass when sprayed.

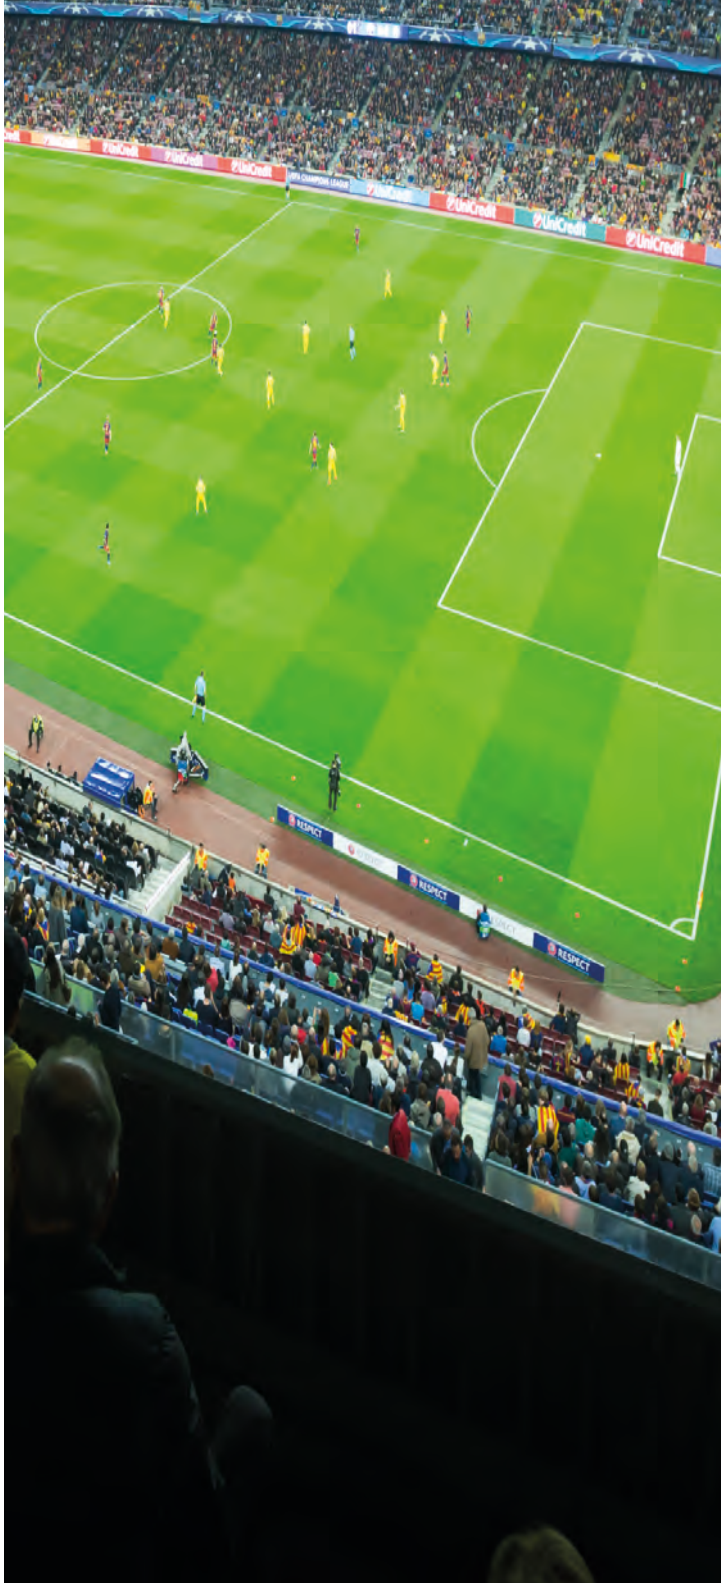

### Sport ready

Fully Certified to not affect ball bounce or ball roll

**Very long lasting - less cost - easy maintenance -**

Watch a demonstration here?

- ✔ GRASSFITT COATING AGENT® Concentrate can be easily diluted with tap water.
- ✔ Application with spray fogging ca. 30cm above the floor.
- ✔ The GRASSFITT COATING AGENT® makes the surface self-cleaning.
- ✔ Deposited dirt from the environment is easily washed off by the rainwater. This also removes unwanted nutrients from the grass blades that promote the growth of algae, mould etc.
- ✔ The artificial grass remains fresh green and playable as on the first day.

For an optimal effect, we recommended applying twice a year.

## Other Products

### Sports Seam Repair:

Description: Specifically designed for repairing sports fields, this powerful aerosol adhesive provides exceptional strength and rapid results, performing well under various weather conditions.

### Artificial Grass Adhesive:

Description: GrassFitt adhesive works in all weather conditions, ensuring strong and fast bonding for all types of artificial grass, including ECO, PU, and latex-backed grass. It's designed for easy application without the need for mixing and is fully recyclable.
